

Flowbird Bi - v2 : SystemBuild Instruction

WebApp Features:

- Create a Webapplication called "Flowbird-Bi_v2"
- Should have Deal page (as default page), Organisation page and Contact page
- There should be a "Deals", "Organisations", "Contacts" and "User" tab/options on the navigation bar.
- When the user selects any one of the options in the navigation bar this should redirect to the respective page. Example deals or organisation or contact.
- When a deal is viewed, this should redirect to the Deal detail page with all the deal's properties.
- When an Organisation is viewed, this should redirect to the Organisation detail page with all the organisation's properties.
- When a Contact is viewed, this should redirect to the Contact detail page with all the Contact's properties.
- Write the instructions of what kind of application you want to build.
 - Features needed (Deals, Organisations, contacts)
 - Layout you want (i.e screenshot of current Flowbird-BI)
 - User login system (Login page design)
 - User permissions (i.e admin, dev, Sales, etc)
- Deals, Organisations and Contacts are objects.
- Need to design database structure in SupaBase.
- All the data for Deal, Organisation and contact objects needs to be stored into Database.
- **Need to have an editable app so that the developer can add custom fields and options.**

DataBase Tables Relationship:

Table	Relationship
Deal	Outgoing connections • Many "Deals" to one "Contact" • Many "Deals" to one "Organisation"
Contact	Incoming Connections • Many "Deals" to one "Contact" • One "Organisation" to many "Contacts" Outgoing connections • Many "Contacts" to one "Organisation"
Organisation	Incoming Connections • Many "Deals" to one "Organisation"

Flowbird Bi - v2 : SystemBuild Instruction

	• Many “Contacts” to one “Organisation” • Many “Users” to one “Organisation” Outgoing connections • One “Organisation” to many “Contacts”
User	Outgoing connections • Many “Users” to one “Organisation”

Flowbird Bi - v2 : SystemBuild Instruction

The screenshot displays the 'All Users' table configuration in the Flowbird Bi - v2 SystemBuild interface. The interface is divided into two main panels.

Left Panel: Fields (12)

This panel lists 12 fields for the 'All Users' table, which has 135 records. The fields are:

- Auto Increment field_440 (Auto Increment)
- Name field_112 (Person)
- Email field_113 (Email)
- Password field_114 (Password)
- User Status field_115 (Multiple Choice)
- User Roles field_116 (User Roles)
- Organisation field_178 (Connection)
- Pipedrive ID field_179 (Short Text)
- User Permissions field_181 (Multiple Choice)
- Password Generator field_183 (Text Formula)
- Initial Password field_182 (Short Text)
- Database field_421 (Connection)

The panel also includes a search bar, a 'Display Field' button, and a 'Showing all 12 fields' indicator with a 'Show less' link.

Right Panel: All Users

This panel shows the connection settings for the 'All Users' table. It indicates that there are 0 incoming connections and 2 outgoing connections.

Incoming Connections (0)

This table has no incoming connections.

Outgoing Connections (2)

- Many (Accounts) to one (Organisation)
- Many (Accounts) to one (Database)

A purple circular icon with a white smiley face is located in the bottom right corner of the right panel.

Database Table: User
